## SUMMARY

I am a solution-oriented and productive developer with a broad range of software development skills. While I create user-friendly and modern interfaces on the frontend, I also build robust and functional infrastructures on the backend using languages such as PHP, C#, Visual Basic, and SQL. With hands-on experience from real projects, I have designed nearly 200 websites to date. I am particularly experienced in developing themes, performing optimizations, and delivering customer-focused solutions on WordPress-based systems. Additionally, during my IT internship, I actively worked in areas such as network, hardware, and system support. My goal is to combine my technical and creative skills to continue delivering effective digital solutions.

## WORK EXPERIENCE

Öztaş San. ve Tic. A.Ş.

Sep 2022 – June 2023

IT Intern / Technician

- I worked as an IT Intern at Öztaş San. ve Tic. A.Ş., where I earned the title of Technician. During this period, I gained extensive experience in software, hardware, and network management. I supported the management of the company's technical infrastructure and actively participated in software development processes.
- I worked on WordPress-based web projects, developing modern and user-friendly websites while improving my skills in web design and optimization. I addressed technical issues effectively, providing fast and efficient solutions, and achieved successful results both individually and as part of a team.
- This experience not only enhanced my technical skills but also strengthened my abilities in problem-solving, teamwork, and project management.

## EDUCATION

Akdeniz University

Oct 2023-June 2025
